A Techno-Aide Exclusive:

Keep your cool with the **CTAV™** Cooling Panel!

Lightweight • Practical • Effective

Patent Pending passive cooling system uses:
- no circulating water
- no dangling tubes
- no ice packs
- no hazardous chemicals

Featuring EVERDRY™
Antimicrobial, antifungal nanocrystal surface keeps you dry and comfortable.

**Without CTAV™:**
- Heat and moisture are trapped between the skin and apparel.
- Sweat cannot evaporate.
- Increased fatigue.
- Heat stress and loss of alertness, concentration, and focus.

**With CTAV™:**
- Air flows across the torso and CTAV™ panel.
- Body heat escapes through passive convection.
- Metabolic heat is conducted into inflated chambers and naturally vents from behind apparel.

The story:
**CTAV™** technology was originally designed to keep police and military personnel cool under pressure while wearing a shielded vest or flack jacket.

Now, Techno-Aide is proud to bring this technology to you, to keep you cool when wearing radiation protection garments for extended or multiple exams.

**Features and benefits of CTAV™:**
- Heat is no longer trapped between you and your apron or vest.
- Passive cooling convective airflow allows your body heat to escape.
- Increased natural ventilation of metabolic body heat.
- Does not affect range of motion.
- Ribbed, air-filled panel dissipates heat and heat storage from the body and the apron or vest.
- Quick harness is repositionable to make the perfect fit for you.
- Quick-action hand air pump is included.

Veterinary Immobilizers

NON-COATED STANDARD GRAY SPONGE
Soft, open cell, polyurethane foam provides excellent support and comfort. This foam has minimal attenuation, is fire retardant, and has been the industry standard for decades. (NOT claw or teeth proof!)

COATED STANDARD SPONGE
This is the same standard gray sponge outlined above, but is coated with a medical-grade, durable and easy-to-clean vinyl surface that is resistant to blood, Betadine®, barium, alcohol, oils and other fluids. Attenuation is very low (edges may show, depending on techniques). Ideal for sterile environments. (NOT claw or teeth proof!)

- Decrease motion and position animals for a variety of procedures.
- Ideal for ventrodorsal view of thorax.
- Non-coated sponges can be placed in covers to keep clean from urine and feces.
- Coated immobilizers can be cleaned for instant reuse.
- As with any soft styled product of this nature, please be aware of claw and teeth punctures to preserve the long life of the sponge or coating.
